The screenshot displays a Kali Linux desktop with a blue geometric wallpaper. In the top bar, the system clock shows 01:30 PM on 01/20/2020, and the battery level is at 68%. Two windows are open:

- Terminal Window (kaliwork@kali: ~/Документы):** The terminal shows the execution of a script named 'key12' which performs a series of operations:
 - Privet Ivan
 - Attempts to sign 'message.txt' but fails due to a missing parameter.
 - Attempts to sign 'message.txt' but fails because the file or directory does not exist.
 - Attempts to sign 'proverka.txt' but fails because the file or directory does not exist.
 - Attempts to sign 'proverka.txt' but fails because the file or directory does not exist.
 - Confirms that 'proverka.sigs' exists and writes a confirmation message.
 - Verifies the signature of 'proverka.sigs'.
 - Verifies the signature of 'proverka.sigs' using a specific key.
 - Displays the RSA key used for signing.
 - Displays the RSA key used for signing.
- File Manager Window (Документы - Файловый менеджер):** The window shows the contents of the 'Документы' directory, listing files: 'proverka', 'proverka.sigs', and 'proverka.sig'.
